

An almost invisible protection! Occupying a central position on your ceiling! Adaptable to almost every lamp that hangs like a ceiling lamp!

WORLD NOVELTY

CARBON MONOXIDE - a fatal respiratory poison! THE UNDERESTIMATED DANGER IS ALMOST EVERYWHERE.

The media always reports on fatal accidents from carbon monoxide. Carbon monoxide develops through defect stoves and heating systems. The scentless gas is dangerous and perfidious since it is not possible to detect it with your human senses. Given that it is lighter than air it rises up. **smalin®** alerts you if the carbon monoxide concentration reaches a dangerous level. It is the perfect „bodyguard“.

UNBEATABLE ADVANTAGES

- smalin® - Smart Alert Inside – an almost invisible protection from three dangers!
- Adaptable to almost every lamp that hangs like a ceiling lamp, mostly occupying a central position on your ceiling.
- It has three separate alarms: fire, temperature and carbon monoxide. You will not have different or distracting warning detectors on your ceiling.
- Fast, clean and easy installation. And you can use them immediately.
- They warn you autonomous and don't use the same electric power supply.
- Integrated sealed batteries per protective function which usually last 10 years.
- It makes different sounds to warn you about smoke, temperature and carbon monoxide.
- It is suitable for your bedroom since it does not blink.
- You can also connect it with other products.
